Department of Pharmaceutical Sciences,
 Guru Nanak Dev University, Amritsar, PB, India
 Supervisor: Dr. Preet Mohinder Singh Bedi

Design and synthesize an extensive library of heterocyclic molecules with anti-tubulin and xanthine oxidase inhibitory activity that can be useful in cancer and gout, respectively.

Establish structure-activity relationship within azacarboline and naphthopyran class of compounds as tubulin and xanthine oxidase inhibitors.

Design and synthesize hybrid compounds using molecular hybridization approach (based on the combination of pharmacophoric moieties of different bioactive substances) with improved affinity and efficacy against cancer.

Perform molecular modelling studies to rationalize binding pattern of synthesized molecules within the enzyme's active sites and enzyme kinetics to further reveal their mechanism to act as enzyme inhibitors.
