Writing Quality Plans: Taking the First Steps!

September 21, 2010

9am - 4pm

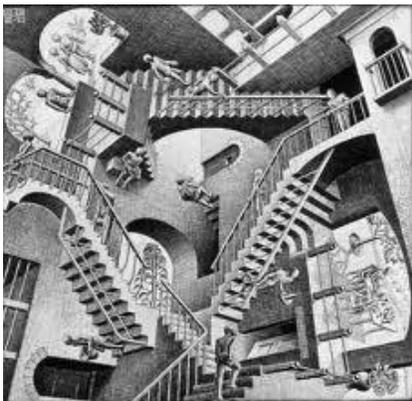

Rockefeller Research Labs, RRL-117

Memorial Sloan Kettering Cancer Center

New York, NY

Are you new to Quality Assurance or have you just been assigned to write or update your facilities Quality Plan? Are you stuck at where to start or what to include? Are you wondering if you should include SOP steps or just reference them? Are you wondering if you are on the right track or if your plan will be good enough to pass an accreditation review?

If you responded yes to one or more of these questions, you are not alone! We may just have the workshop for you. Designed for beginners with a basic understanding of Quality Assurance concepts, this **FREE**, grass roots workshop has been developed in response to member feedback to the ISCT North American Legal and Regulatory Affairs Committee for the need for practical workshops that will produce tangible work products.

In the true spirit of a **WORK** shop, seasoned quality professionals will present information about elements to cover in your Quality Plan followed by facilitated work sessions where you will use the presented material to craft outlines, develop questions to take back to your management team, and begin the draft of your Quality Plan.

The facilitators will be available to review your work for constructive feedback. Time will be provided for developing networking with fellow participants. You are encouraged to bring a laptop, but pen and paper supplies are acceptable to use for workshop activities.

Registration will open online via the ISCT website at 10am PT; 1pm ET on Wednesday July 28th.

This workshop is available to ISCT Members only. Space is limited so register early.

REGISTRATION IS FREE!

You must use your active membership login/password to register.

Once online registration is full, you may place yourself on the [waitlist](#).

Organizing Committee

Co-Chairs:

Wade Atkins, NIH
Karen Nichols, PerkinElmer, Inc.
